Under the labor and supervision of their "Executive Committee," and their worthy secretary, Dr. Elisha Harris of New York, they have published two volumes of their transactions, containing the most elaborate and searching investigations of questions of public health, a copy of which should be in the hands of every regular physician in this country. One of the objects of this association is the creation by law of State Boards of Public Health in every State in the Union. Already twelve States have authorized such Boards. This work also meets the cordial co-operation and assistance of the American Medical Association. In response thereto, on the part of West Vignia, we would say that in 1875 Dr. M. S. Hall, of Ritchie county, introduced a bill in our State Legislature to which

aponee thereon, on the part of the grant of al Institutions, by whom it was reported back to the House of Delegates with a recommendation to pass. Just at this time an endemic called "Capital on the brain" was raging in the House, and they failed to give the bill the consideration it There are many cogent reasons for the legal organization of such State Boards, some of which will appear from the folsome of which will appear from the fol-lowing outline of the powers and duties intended to be conferred: they are "to take cognizance of the interests of life and health among the people of the State, make sanitary investigations, and inquire respecting the causes of disease, especial-ly of epidemics, the sources of mortality, effects of localities, conditions, employ-ments, ingests, habits and circumstances were the authic health, and collect inpublic health, and collect in-on these and kindred subjects; formation on these and kindred subjects; make special investigations, whenever directed by the Governor or Legislature, of all public schools, prisons, or public buildings in regard to the drainage, water supply, disposal of excreta, heating and ventilation. Boards of Health in every city, county and town, who shall collect information of and make suggestions in matters involving the public health, and report the same to the State Board with whom they shall co-operate to prevent the spread of disease and for the protection of life. To have the supervision of the State system of registration of births, marriages and deaths, and make annual reports to the Governor upon the vital statistics and sanitary condition of the State, also their investigations, discoveries and suggestions." The practical work of such Boards is such as to touch the vital interests of every grade of society, to grapple with the monsters of pestience and death to fore-warn and fore-arm against the strange unseen, insidious forms of disease in the size we heather in our food Basted is such as to touch the vital interests of eyer grade of osciety, to grapple with the monsters of pestilenes and death to far warr and lore-arm against the strange unseen, insidious forms of disease in the air we breather, in our food and drink, and from the earth we tread upon. To the farmers, who constitute the great majority of the inhabitants of our State, it is a matter of interest to investigate the causes and effects of disease in cattle, as "malignant authrax producing malignant pustule in herdsmen," "Heriditary entailments in domestic animals and in the human family," the "effect of the use of poisons to destroy insects is wheat, potators," "etc.," on potato rot as a cause of disease," on hos good chars and irichina with the diseases communicated to man by their use as lood," causes and effects of epizootic in horses," etc.," and affects of epizootic in horses, etc., and the total control of the experimental experimental

Such is its fate and history; I leave it with you, hoping you will use your influence and logic with the members of the Legislature in your respective counties to change their vote at the next session. If preachers and ministers control religious matters, and lawyers and jurists questions of law, it is surely safe to commit the care of the public health to physicians.

BANE OF TURKING WELFARE. The Harem the Root of all Evil in the Ottoman Empire.

Through the courtesy of General Mott
I was introduced, a few days since, to one
of the most important men in the Turkish
Empire. I allude to Youssouf Zia El
Khalidee, the Member of the Ottoman
Parliament from Jerusalem. His name
may not be so familiar on our side of the
water as that of the Sultan or Edhem
Panhs, but as the representative of the
progressive, intellectual and reform element in Turkey he is entitled to more
consideration than any man I know of in onsideration than any man I know of in

ment in Turkey he is entitled to more consideration than any man I know of in this section.

A state Board of Public Health in West Virginia.

Estate from the remarks of Dr. E. A. Hildreth, of Wheening, before the West Virginia Medical Society.]

You are all doubtless aware that for many years past in the more enlightened countries and cities of Europe, great attention has been paid to the subject of sanitary science and hygient. The results have proved most salutary in reducing largely the death rate by executing such sanitary laws as preclude the origin, or prevent the spread of contagious or epidemic diseases. The people of our Republic are so miserably free, or independently ignorant of sanitary science, that the philanthropists of our country have found it expedient to form an association for the purpose of disseminating sanitary knowledge among the people, and thus to educate them in public hygiene. This organization is the "American Public Health Association," a body for intelligence and philanthrophy second to none in the land. Under the labor and supervision of their "Executive Country and law proved and the example, the results have brought, to show that it is the abuse of the religion to none in the land. Under the labor and supervision of their "Executive Country and the example, the lame. Mobiumed set the example, the lame. Mobiumed set the example, the lame. The purpose of our week mainly—in other words, the lame. The purpose of the province of the province

to show that it is the abuse of the religion that has brought all our evils upon up. The polygamous clause is the cause of our woes mainly—in other words, the harem. Mohammed set the example, but the Koran only admits of more than one wife where the man is physically and financially capable of caring for more than one. I know of no man who is properly able to provide for more than one. The Koran throughout inveighs against family extravagance. Our system of abuse of the religion has for years given unbounded license. Our officials have built up great harems, and have been driven to corruption to maintain them. What is to be expected of a Government under which the Minister of Interior has eighty wives or women; another sixty, and so on? Can we have purity or honesty under such a system? The present Sultan has 600 women, and the list is increasing. Some of them are actual inmates of the harem, and others are women who are no longer attractive and who are now carried on pension rolls. It is said that 5,370 mouths are daily fed from his table. It is impossible to have honest government under such a system. I am constantly preaching against the harem and against polygamy. I had intended bringing a measure before the Chamber to restrict or prohibit this crime against society, but I am not determined now as to my course. I have made myself very unpopular with the ruling classes. Some reform might be brought about by legislation in five or ten years, but what we need is bloodshed and revolution. No great advance was ever made without it. France had fallen as low under the class of the but what we need in Diocasted and twointion. No great advance was ever made
without it. France had fallen as low under the Bourbona as Turkey is to-day.
Her rulers were equally corrupt. A revolution gave her new life. Cromwell regenerated England with the sword. Ausin-life wed your own country have all tria, Italy and your own country have all been benefitted by civil war. Deep-seat-ed wrongs must be cured by violence. I expect to preach my doctrine until I am killed. Out of some such event may come the revolution which will bring to the surface men capable of giving the per ple good government. The Sulta ple good government. The Sultan must be deprived of every vestige of autocratic power. I am will ling that we should have a Sultan as mere figure-head—an embodiment of gov.

ernment such as the Queen of England A man who is raised by eunuchs in th midst of women cannot be fit for an En peror. He is but an animal in instincts an a child in intellect. Let him busy him self with church, and let the people a cniu in intellect. Let him busy him-self with church, and let the people, through their representatives and the Ministry, rule. I am radical in my no-tions, as you will perceive, and I expect one of these days to pay the penalty, but the blood of the martyrs gave Christian-ity strength, and I am willing for any-thing that will quicken the people and hasten the revolution which alone can give life to Turkey. give life to Turkey.

25 and 27 Fourteenth St. DR TUTTS PILLS

THE MOST POPULAR PILL ever furnished the American people. The high-est medical authorities concord their superiorly over all others, because they possess afteralive, tonic, and healing properties contained in no tother medicine. Being strongly Anti-Bilions, they expel all humors, correct a viliated state of the system, and, being purely vegetable, they do not, like other pilis, leave the stomach and being the control of the control, then they found them, but, on-the contrary, lumar a healthy tone and vigor before unknown.
